Using e-Residency
Establishing a startup

Legal Forms

According to the Commercial Code, there are five forms of business entities:

- Software development
- Mechanical engineering
- High-tech systems
- Mechatronics
- CleanTech

In addition to the possibility of establishing a business entity, it is possible for any natural person to conduct business as a sole proprietor who must be entered in the commercial register before commencing with permanent business activity.

Foreign companies can also offer their goods or services by establishing a branch. The branch must be registered in the Estonian Commercial Registry by submitting an application and required documentation. It should be considered that a branch is not a business entity and the foreign enterprise is liable for obligations arising from the activities of the branch.

Most common forms of business entities in Estonia are private limited company (OÜ) and public limited company (AS). Detailed information about other company types is available in the Commercial Code

According to the Commercial Code, there are five forms of business entities:

- Software development
- Mechanical engineering
- High-tech systems
- Mechatronics
- CleanTech

The cover story features Allan Martinson, former COO of Starship Technologies, who talks about a powerful new generation of local startups, the idea of every Estonian newborn being given a private company, and the future of work.

Estonian promising startup Veriff is on a mission to win the trust of the internet with their online identity verification system. In the process – they have managed to with the trust of the world famous actor Ashton Kutcher, who invested in the company.

Autumn is a good time to talk about education. World-famous entrepreneur and founder of Mindvalley University Vishen Lakhiani is set to change the global education system starting from Estonia. Read about his thoughts on transformational education, entrepreneurship and success.

Education is also on the mind of entrepreneur-turned-VC Taizo Son. Having invested in a number of Estonian startups, Taizo Son is currently working on a kid's creativity and learning environment VIVITA. He believes that Estonia, being one of the world most digitally advanced countries, is an ideal location to set up another physical space of VIVITA.
